SERIES

0805 (Pb Free)

SCOPE

This specification describes RC0805 series chip resistors with lead-free terminations made by thick film process.

ORDERING INFORMATION

Part number is identified by the series, size, tolerance, packing type, temperature coefficient, taping reel and resistance value.

YAGEO ORDERING CODE

CTC CODE

RC0805 $\underline{X} \underline{X} \underline{X} \underline{X} \underline{XX} \underline{XXXX} \underline{L}$

(1) (2) (3) (4) (5)

(I) TOLERANCE

 $F = \pm 1\%$ $J = \pm 5\%$

(2) PACKAGING TYPE

R = Paper/PE taping reel

(3) TEMPERATURE COEFFICIENT OF RESISTANCE

- = Base on spec

(4) TAPING REEL

07 = 7 inch dia. Reel

10 = 10 inch dia. Reel (not preferred)

13 = 13 inch dia, Reel

(5) RESISTANCE VALUE

5R6, 56R, 560R, 5K6, 56K, 22M.

(6) RESISTOR TERMINATIONS

L = Lead free terminations (pure Tin)

ORDERING EXAMPLE

The ordering code of a RC0805 chip resistor, value 56 Ω with ±1% tolerance, supplied in 7-inch tape reel is: RC0805FR-0756RL.

NOTE

- The "L" at the end of the code is only for ordering. On the reel label, the standard CTC will be mentioned an additional stamp "LFP"= lead free production.
- Products with lead in terminations fulfil the same requirements as mentioned in this datasheet.
- 3. Products with lead in terminations will be phased out in the coming months (before July 1st, 2006)

MARKING

RC0805

E-24 series: 3 digits

First two digits for significant figure and 3rd digit for number of zeros

Both E-24 and E-96 series: 4 digits

First three digits for significant figure and 4th digit for number of zeros

For marking codes, please see EIA-marking code rules in data sheet "Chip resistors instruction".

CONSTRUCTION

The resistors are constructed out of a high-grade ceramic body. Internal metal electrodes are added at each end and connected by a resistive paste. The composition of the paste is adjusted to give the approximate required resistance and laser cutting of this resistive layer that achieves tolerance trims the value. The resistive layer is covered with a protective coat and printed with the

resistance value. Finally, the two external terminations (pure Tin) are added. See fig. 3.

NOTE

1. For Paper/PE tape and reel specification/dimensions, please see the special data sheet "Packing" document.

FUNCTIONAL DESCRIPTION

POWER RATING

RC0805 rated power at 70°C is 1/8 W

RATED VOLTAGE

The DC or AC (rms) continuous working voltage corresponding to the rated power is determined by the following formula:

$$V=\sqrt{(P \times R)}$$

Where

V=Continuous rated DC or AC (rms) working voltage (V)

P=Rated power (W)

R=Resistance value (Ω)
